

KARDEX® Heavy Duty Mobile Aisle Solutions for Pallet Storage

Vistamation Product Brief

The economic climate industry faces today is presenting new challenges. Streamlining and “do more with less” directives are allowing production managers less warehouse space while demands for increased productivity and profitability rise. Vistamation offers a solution to bringing these conflicting pressures in line. Mobile Aisle Systems can reclaim as much as 50% of your existing production / warehouse floor space in an extremely cost justifiable fashion. The ability to consolidate operations and/or delay a major facilities relocation will make a big impact to your bottom line.

Features:

- All load weight distributed directly over wheels, maximizing weight capacity.
- Dependable heavy-duty motor insures years of maintenance-free operation.
- Photoelectric sensor slows range movement as aisle closes; no bumper arm projecting in aisle.
- All wheels are driven by a full-length drive shaft for smooth operation.
- Warning horn sounds 3 seconds before range movement begins and continues throughout movement.
- Mechanical override permits continued operation in the event of a power failure.
